Errors in variables 829
Estimated generalized least squares 1
Estimating equations 459
Estimating function 645
Estimating number of species 863
Event-related potentials 1069
Exact inference 529
Exact tests 361
Exchangeable variables 73
Explicit estimators 743
Exponential family regression model 911
Extreme value distribution 807

False-negative rates 619
False-positive rates 619

Familial aggregation 939
Feline leukemia virus 839
Fiducial method 1145
Fish 1201
Fisher's exact test 1103
Fisheries 237
Frailty models 795
Fréchet minimal and maximal distribution 1207
Fries hypothesis 807
Functional regression 1263

Gene encyclopedia 337
General relative risk models 781
Generalized estimating equation 19, 939, 1095
Generalized least squares 271
Generalized linear models 1, 31
Generalized mixed-effects nonlinear regression models 1
Generalized Pareto distribution 807
Genetic epidemiology 939
Genetic markers 305
Genome mapping 337
Geographic variability 1113
Gibbs sampler 631
GLIM 567
Goodness of fit 711
Graphical model 259
Grey level erosion 1273
Group sequential analysis 373, 1033
Group sequential procedures 1131
Grouped survival data 605
Growth 1057
Growth curves 1

Hardy–Weinberg 361
Herring gulls 217
Heterogeneity 41, 201
Hevea brasiliensis 1165
Hidden Markov model 317, 545
Historical controls 459
Hodges–Lehmann estimator 1033
Homogeneity of proportions 577
Hypothesis testing 559

Ill-posed integral equation 175
Image analysis 1273
Image processing 1273
Incidence 587
Incidence data 117
Incomplete data 259, 1015
Incomplete tables 1249
Infection from the community 117
Infection within the household 117
Infectious diseases 751
Informative censoring 765
Integrated rate expression 929
Interaction 267
Interim analyses 373
Interval censoring 951
Intracluster correlations 577
Ionic channels 427
Iteratively reweighted least squares 665

Jackknife 863
Joint conditional independence hierarchical model 1113
Joint modelling 1
Joint toxicity experiments 155

Kalman filter 237
Kaplan–Meier estimate 679
Kaplan–Meier plot 101
Kullback–Leibler information 259

Leukemia 781
Levene test 819
Likelihood displacement 507
Likelihood interval 567
Likelihood ratio test 31, 87, 593, 1223
Line transect sampling 901
Linear random effects 765
Linear regression model 679
Linkage disequilibrium 1103
Local influence 507
LOD score 305
Log-linear, linear, product modeling 1249
Log-linear models 259, 567
Log-rank test 373
Logistic regression 397, 459, 631
Logit 1145
Longitudinal data 1, 721, 743
Lumpability 751
Lung function 175

Mallards 217
Mann–Whitney *U* 61
Mantel–Haenszel estimator 961
Mantel–Haenszel test 577, 695
Marginal distribution 1207
Marginal models 1095
Mark–recapture 567, 877, 1201
Markov 1165
Markov chain 361, 427, 545
Matched case–control studies 31
Matched-pairs design 397
Maximum likelihood 117, 129, 237, 507, 545, 665, 853, 863, 911, 965, 1113, 1289
Mean 889
Measurement model 1263
Median filters 1273
Medical diagnostics 497
Meta-analysis 41
Metropolis algorithm 361
Michaelis–Menten kinetics 929
Misclassification 259
Misspecification model 893
Mixed data 497
Mixed linear models 987
Mixed models 61
Mixture models 87, 283, 911
Model unbiased 1195
Modèle de Gibbs 1165
Modelling 217
Monte Carlo 361, 631
Morphological filters 1273
Multinomial distribution 1177
Multinomial model 163
Multiple alleles 361
Multiple classes 939
Multiple comparisons 1005
Multiple logistic regression 721
Multiple record systems 567
Multiresponse estimation 1235
Multistratum design 1015
Multivariate calibration 1081
Multivariate inference 751
Multivariate linear regression 155
Multivariate *U* statistics 1033

Nested case–control studies 781
Nesting structure 939
Nominal significance level 373
Nonadditivity 267
Noncentral chi-square 31
Noncentral hypergeometric distribution 889
Non-Gaussian smoothing 1187
Nonlinear model 911
Nonlinear regression 507
Nonlinear response model 1081
Nonparametric estimation 1043
Nonparametric methods 1057
Nonparametric mixture 545
Nonparametric regression 1069
Normal response 373
Normal variates 877

Odds ratio 259, 961, 1289
Optimal design 55, 1235
Optimal starting design 929
Optimum allocation 389
Ordered categorical data 61, 271
Ornstein–Uhlenbeck process 73
Overdispersion 163, 459, 545, 711
Overview 41

P-values 1005
Panel data 751
Parameter estimation 317
Parametric methods 733
Particle size distributions 449
Patch clamp 427
Pathologie forestière 1165
Pearson correlation coefficient 1207
Percentile estimation 1057
Permutation invariance 751
Pharmacokinetics 1
Phase I trial 853
Phenotype probability 143
Physical mapping 337
Piecewise polynomial 1057
Pitman efficiency 645
Poisson distribution 545, 1187
Poisson intervention inference 559
Poisson likelihood 781
Poisson regression 605
Polynomial response curves 765
Population size 201
Power 31
Precision 599, 877
Predictive density function 683

Predictive plot 101
Predictive value positive 839
Prevalence 587, 839
Probability of coincidence 143
Probit 1145
Processus spaciaux 1165
Product limit estimator 87, 1223
Profile likelihood 567, 1081
Propensity score 479
Proportional hazards 411
Proportional hazards model 829
Proportional hazards regression 795
Protozoan filter feeding 1235
Psuedo nonlinear random-effects models 1

QTL mapping 305
Quasi-likelihood 163

RFLP 305
Radiation 781
Radiation risk 605
Radiotelemetry 877
Random coefficient regression 1
Random effects 41, 733
Random effects model 631
Random subject effect 1157
Randomization test 1069
Randomized experiment 695
Rank test for independence 73
Ranks tests 61
Rare species estimation 1195
Ratchet scan statistic 1177
Ratio estimate 695
Recursive formula 1187
Reduced-rank regression 155
Regression to the mean 593
Regression trees 411
Relative efficiency 645, 893
Relative risk 961
Repeated confidence intervals 1033
Repeated measures 1, 19, 645, 733, 743, 965, 1015, 1033
Repeated significance tests 373
Reproducibility 599
Residual effects 1157
Residual maximum likelihood 1015
Residuals 267
Restriction fragment length polymorphism 1103
Retrospectively ascertained data 129
Rhinovirus 117
Ring-recovery 217
Risk assessment 163
Risk ratio 1215
Robust test 819
Robustness 373, 1145
Rotenone sampling 1201

Sample coverage 201
Samle mean 877
Sample size 31, 389
Sample size calculations 877
Sample size problem 1103
Sampling 1201
Score 271
Score test 87
Screening trial 593
Seasonality 1177
Seemingly unrelated regressions 683
Seizure data 317
Semiparametric efficiency 479
Semiparametric model 129, 795
Semiparametric regression 479
Senescence 807
Sensitivity 839
Sensitivity analysis 1235
Separable error process 1015
Sequential monitoring 1131
Sequential procedures 55
Sighting surveys 901
Signal homogeneity 1069
Simplex algorithm 1235
Simulated annealing 1235
Simulation 217
Simultaneous inference 1005
Smoothing 1057, 1069
Spatial correlation 1015
Specificity 839
Spending function 765
Sphericity 883
Stable populations 587
Standardization 1215
Stereology 449
Stochastic modeling 1235
Stopping rules 41
Stratification 189
Subsets of parameters 1235
Succession procedure 373
Succession of significant tests 373
Sufficiency 751
Summary score statistics 695
Surrogate variable 259
Surveillance data 1187
Survival analysis 507
Survival function 807
Swiss cheese problem 449
Synthetic oligonucleotides 337

Taylor series 877
Temporal correlation 1015
Teratology 163
Test for homogeneity 1187
Tetrachoric correlation 1095
Threshold levels 619
Ties 73
Time-dependence 217
Time-dependent covariates 1015
Time variation 201
Toxicity 853
Trend test 529
Trend tests for proportions 459
Truncation 1043
Tumor registry 1249
Two-by-two tables 961, 1103, 1289
Two-sample test 1223
Type I error 1131

Ultrasound blood flow waveforms 683
Unbalanced data 1, 987
Underprojection 449
Unfolding algorithm 449
Unrestricted and restricted support size 283
User-friendliness 373

van Elteren test 61
Variable reporting rates 217
Variance 889
Variance components 987
Variance correction 271
Variance estimation 189
Variance model 19
Ventilation–perfusion distribution 175
Von Mises distribution 665

Wald test 87
Weibull model 951
Weighted least squares 1081
Weighted log-rank statistic 893

Yeast artificial chromosome 337

Zidovudine 619
Zinc 155

INDEX OF BOOKS REVIEWED, VOLUME 48

ALTMAN, D. G. **Practical Statistics for Medical Research** (S. D. Walter) 656

BALAKRISHNAN, N. and COHEN, A. C. **Order Statistics and Inference: Estimation Methods** (R. Newson) 657

BARTHÉLEMY, J.-P. and GUÉNOCHE, A. **Trees and Proximity Representations** (A. D. Gordon) 332

BOOKSTEIN, F. L. **Morphometric Tools for Landmark Data: Geometry and Biology** (R. A. Reyment) 1301

BOWERMAN, B. L. and O'CONNELL, R. T. **Linear Statistical Models: An Applied Approach** (Editors) 333

CHEN, X. R., FANG, K. T., and YANG, C. C. (eds). **The Development of Statistics: Recent Contributions from China** (Editors) 1303

CONSUL, P. C. **Generalized Poisson Distributions: Properties and Applications** (A. W. Kemp) 331

COOKE, D., CRAVEN, A. H., and CLARKE, G. M. **Basic Statistical Computing, 2nd edition** (D. Rasch) 658

CRESSIE, N. **Statistics for Spatial Data** (R. M. Cormack) 1300

EVERITT, B. S. **The Analysis of Contingency Tables, 2nd edition** (B. S. Everitt) 977

FIENBERG, S. E., HOAGLIN, D. C., KRUSKAL, W. H., and TANUR, J. M. (eds). **A Statistical Model: Frederick Mosteller's Contributions to Statistics, Science, and Public Policy** (Editors) 333

GOLDSTEIN, J. A., KAPPEL, F., and SCHAPPACHER, W. (eds). **Differential Equations with Applications in Biology, Physics, and Engineering** (Editors) 1303

GROVES, R. M. **Survey Errors and Survey Costs** (L. Paterson) 974

HARRIS, E. K. and ALBERT, A. **Survivorship Analysis for Clinical Studies** (J. D. F. Habbema) 331

HARTER, H. L. **The Chronological Annotated Bibliography of Order Statistics, Volume IV: 1962–1963** (Editors) 660

HARTER, H. L. **The Chronological Annotated Bibliography of Order Statistics, Volumes V (1964–1965) and VI (1966–1967)** (Editors) 977

HEDAYAT, A. S. and SINHA, B. K. **Design and Inference in Finite Population Sampling** (G. R. Cohen) 1299

HILL, A. B. and HILL, I. D. **Bradford Hill's Principles of Medical Statistics, 12th edition** (Editors) 659

HINKLEY, D. V., REID, N., and SNELL, E. J. (eds). **Statistical Theory and Modelling: In Honour of Sir David Cox, FRS** (A. W. Kemp) 1298

JACKSON, J. E. **A User's Guide to Principal Components** (B. S. Everitt) 974

KAPUR, J. N. **Maximum-Entropy Models in Science and Engineering** (Editors) 333

KARIAN, Z. A. and DUDEWICZ, E. J. **Modern Statistical, Systems, and GPSS Simulation: The First Course** (R. C. H. Cheng) 332

LEVY, P. S. and LEMESHOW, S. **Sampling of Populations: Methods and Applications** (G. R. Cohen) 1299

MANLY, B. F. J. **Randomization and Monte Carlo Methods in Biology** (J. E. Gentle) 973

MARDIA, K. V. (ed.). **The Art of Statistical Science: A Tribute to G. S. Watson** (C. B. Read) 1297

MENDENHALL, W., WACKERLY, D. D., and SCHEAFFER, R. L. **Mathematical Statistics with Applications, 4th edition** (S. Loukas) 977

MEZEI, L. M. **Practical Spreadsheet Statistics and Curve Fitting for Scientists and Engineers** (Editors) 334

MYERS, R. H. and MILTON, J. S. **A First Course in the Theory of Linear Statistical Models** (D. Böhning) 1302

OTT, J. **Analysis of Human Genetic Linkage, revised edition** (A. W. F. Edwards) 975

PEARSON, E. S., PLACKETT, R. L., and BARNARD, G. A. **"Student": A Statistical Biography of William Sealy Gosset** (C. D. Kemp) 329
